PROFESSIONAL SUMMARY

Computer Science student and aspiring Software Developer with hands-on experience building full-stack web applications and deploying projects using modern development technologies. Skilled in Java, JavaScript, Python, React, HTML, CSS, REST APIs, Docker, Git, GitHub, and Vercel. Experienced in developing responsive web applications, integrating frontend and backend components, working with APIs, and deploying applications to the cloud. Passionate about software engineering, scalable systems, cloud technologies, and continuously learning new technologies.

TECHNICAL SKILLS

Languages: Java, JavaScript, Python, HTML, CSS

Frontend: React.js, Responsive Web Design

Backend: Node.js, REST APIs

Databases: MongoDB, MySQL

DevOps & Tools: Docker, Git, GitHub, Vercel, Postman

Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, Microservices, Kubernetes

PROJECT EXPERIENCE

Wine Explorer — Full-Stack Web Application

React.js | Node.js | REST API | Vercel

- Developed a full-stack web application for exploring and displaying wine-related information.
- Built responsive frontend components for browsing and interacting with wine data.
- Integrated frontend and backend functionality to provide dynamic content.
- Implemented API-based data retrieval and application logic.
- Deployed the application using Vercel.
- Focused on creating a clean, responsive and user-friendly interface.

Live Project: <https://wine-explorer-sigma.vercel.app/explore>

EXPERIENCE

Software Developer — Project-Based Experience

Personal & Academic Projects

- Developed and deployed multiple web applications using modern frontend and backend technologies.
 - Built full-stack applications integrating frontend interfaces with backend services and APIs.
 - Used Git and GitHub for source-code management and version control.
 - Deployed production applications using Vercel.
 - Worked with Docker for containerized development environments.
 - Troubleshoot deployment, environment-variable, API and application configuration issues.
 - Continuously explored modern software development practices including microservices, Kubernetes and cloud deployment.
-
